SUMMARY

Python backend developer with commercial experience since 2020. I own projects end-to-end — requirements and client communication, architecture and database design, API development, third-party integrations, deployment and production support. Main stack: **FastAPI, Django/DRF, async SQLAlchemy 2.0, PostgreSQL, Redis, Celery, Docker, Nginx**. Delivered taxi and marketplace platforms, CRMs, loyalty apps, e-commerce, scrapers and mobile apps (Flutter). Security-minded: OWASP Top 10, JWT, 2FA/OTP, Argon2, rate limiting, RBAC. Looking for a fully remote role (employee or B2B contractor).

EXPERIENCE

Python Backend / Full-Stack Engineer · Freelance, independent Oct 2025 — Present

- Deliver backend and full-stack projects for multiple clients: requirements, estimation, architecture, DB schema and API design, deployment and support.
- FastAPI services on async SQLAlchemy 2.0 + asyncpg, PostgreSQL, Alembic, Redis, Celery, JWT auth, WebSocket; layered architecture (api / services / repositories).
- Integrations: iikoCloud POS, Zadarma telephony, Retell AI voice agent, payment providers, Firebase (FCM), Telegram Bot API.
- Production on Linux VPS: Docker Compose, Nginx, SSL, logging, cron; code review and task review for other specialists.

Python · FastAPI · Django REST Framework · SQLAlchemy 2.0 · PostgreSQL · Redis · Celery · pytest · Docker · Nginx · Flutter

Python Backend Developer · Wazir KG (freelance contract) Jan 2024 — Sep 2025

- Designed and built the backend of a multi-service ecosystem — taxi, classifieds, real estate, e-commerce — as separate FastAPI services with a shared architecture.
- Taxi platform (EcoTaxi): REST API and WebSocket for drivers, clients and dispatchers; orders, real-time geolocation, 2GIS maps, roles & permissions, JWT, push notifications, driver balance and photo control.
- Database design and Alembic migrations, Celery/Redis background jobs, Telegram bot, Docker Compose and Nginx production setup.
- Built the Flutter apps EcoTaxi Driver and EcoTaxi Client.

FastAPI · PostgreSQL · SQLAlchemy · Alembic · Redis · Celery · WebSocket · Docker · Nginx · Flutter

Full-Stack Web Developer · Freelance Jan 2020 — Dec 2023

- Dozens of commercial projects for small businesses: corporate sites, online stores, admin panels, custom modules and API integrations.
- PHP / Laravel / MySQL, WordPress, OpenCart, 1C-Bitrix; responsive frontend from design mockups; React, Vue, TypeScript and Node.js on selected projects.

SELECTED PROJECTS

Logtex CRM — custom Python app for Frappe CRM (B2B sales): Zadarma telephony with call recordings in the client card, Retell AI voice bot that auto-fills the card after a call and runs outbound dialing by filters, duplicate detection by normalized phones/sites/emails, e2e tests for business logic and permissions. github.com/isikjon/logtex

Makovka loyalty app — FastAPI + async SQLAlchemy 2.0 backend: phone OTP auth, JWT, hashed codes; iikoCloud POS integration (guest creation, loyalty cards, bonus sync); Flutter client. github.com/isikjon/makovka_backend

Donskih club app — layered FastAPI backend (JWT, Redis, Alembic), API tests with pytest / pytest-asyncio / httpx, Flutter app with FCM push. github.com/isikjon/donskih

Quantera — Django REST Framework service with personal accounts: 2FA (OTP/QR), Argon2 hashing, rate limiting, CORS policy, Celery + Redis, Docker Compose + Nginx.

Woodstream — antique furniture e-commerce on Laravel 12 + Filament 3, tuned for a large catalog (indexes, caching, eager loading); real-time company messenger on Laravel Reverb with a SwiftUI iOS client.
github.com/isikjon/woodstream_prod

SKILLS

Backend	Python, FastAPI, Django / DRF, SQLAlchemy 2.0 (async), Alembic, Pydantic, Celery, httpx / aiohttp, Playwright, Selenium
Databases	PostgreSQL, MySQL, Redis, MongoDB, SQLite — schema design, indexes, transactions, query optimization
APIs & integrations	REST, WebSocket, OpenAPI, webhooks, JWT, RBAC, payments, iikoCloud, telephony, Telegram Bot API, Firebase
DevOps	Docker, Docker Compose, Nginx, Linux (Ubuntu), VPS, SSH, SSL, Git, cron, logging
Testing	pytest, pytest-asyncio, httpx API tests
Full-stack & mobile	PHP, Laravel, Filament, React, Next.js, TypeScript, Node.js, Flutter / Dart, React Native
Security	OWASP Top 10, secure API design, 2FA/OTP, Argon2/bcrypt, rate limiting, CORS, secrets management

EDUCATION

Tashkent University of Information Technologies
Bachelor's in Information Technologies · 2026 — 2030 (in progress)

LANGUAGES

English — B2 (Upper-Intermediate) · Russian — fluent
Uzbek — native · Tajik — fluent
